

Safety

The curve of the shower rod keeps floors dry by curving in at the corners. The shower curtain stays in the tub keeping water from leaking out. This unique feature also keeps walls dry and damage free.

Comfort

The curved shower rod gives you increased comfort by creating additional elbow room. The curve of the shower rod increases showering space by up to 9".

Design

The curved shower rod is oval in circumference to prevent spinning. It's simple to install - just three steps and you're ready to use the shower.

Easy to Install

Our curved shower rod comes with everything you need for installation. We include all the hardware, mounting brackets and step by step instructions.

The Curved Rod's New Oval Design

- Prevents Rolling & Sagging Rods
- Adds up to 9" of Space to Existing Shower
- Prevents Leaking
- Fits Standard Shower Curtains
- Available in Four Finishes

The Product is Patent Pending

add some
Curve Appeal

Adding a curved rod in your bathroom is an inexpensive way to add unique style and create a bathroom you will love.

a curved shower rod adds...

- More Space
- More Comfort
- Unique Style

Uses standard shower curtain - Easy to install

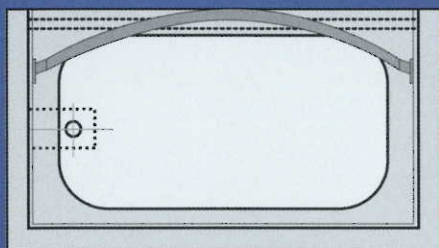

Our curved shower rod adds a stylish and contemporary look.

The Curved Rod

Standard Tubs

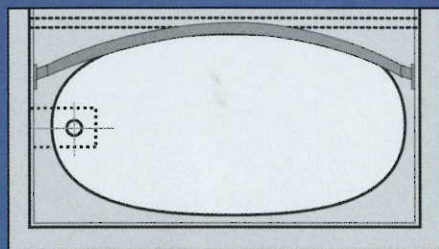

The curved shower rod is designed to fit beautifully with a standard bathtub. The bracket allows for adjustments for any size opening of a standard 5 ft. bathtub. For standard tubs over 5 ft. a 6 ft. curved shower rod is the perfect fit. The curved shower rod can be easily modified for bathtubs smaller than 5 ft.

Standard Tubs

Oval Tubs

Our curved shower rod is a perfect fit for an oval bathtub. The curve of the shower rod fits the curve of an oval tub allowing you the use of the added space and comfort an oval tub was designed for. A 6 ft. shower rod is perfect for oval tubs larger than 5 ft.
