

CORONADO

BLOCK SHUTTERS™

Over the past ten years, more and more people have discovered the beauty and benefits of acrylic block windows. Always on the forefront of exciting innovations, U.S. Block Windows now introduces Coronado Block Shutters™. These cost effective interior block window coverings install right over existing windows, just like shutters or blinds, and have all the benefits of both shutters and block windows.

This truly innovative window covering gives you privacy while allowing light into the room. The shutters mount in minutes and are an excellent way to give the luxurious look of acrylic block to existing master bathroom garden tub windows. No major construction is required. Just a 20 minute installation which complements your shutter or blind package.

Coronado Block Shutters™ can be built to any height or width dimension, and will completely alter the look and feel of a room. Coronado Block Shutters™ offers a full line of block window covering solutions for inside or outside mounting in fixed panel, in-swing shutter or café style up-slide. Coronado Block Shutters™ solid cellular material offers a realistic wood shutter look with none of the disadvantages that come with using real wood products.

Coronado Block Shutters™ are made of a solid cellular synthetic foam with a hardened finish that is dent resistant. Our block shutters are painted with permanent bonding acrylic paints that will not yellow with age. For varied privacy, our blocks come in two patterns: Clear Wave or Obscured Wave.
